

OVERHEAD PROTECTION SYSTEMS

The Inflatable Overhead Protection Systems (OPS) provides industry leading benefits for protecting mine and industrial personnel.

Specifically engineered to reduce the risk of freefall materials, this inflatable system is a safe, efficient and cost effective form of protection for personnel and infrastructure. The OPS can easily be deployed in various settings such as underground and surface mining.

FEATURES AND BENEFITS

- High-strength inflatable materials
- Standard and custom shapes

- Crated for easy transport
- Portable and re-usable

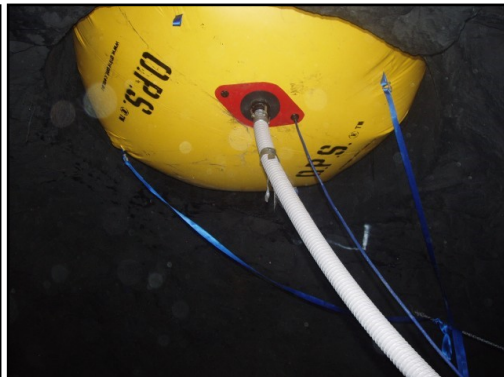

- Rapid deployment and inflation
- Cost effective

- Integral stopping for overhead protection
- Control box with air regulator

- On-site training available
- Fire resistant for mining and tunneling
- Safe and efficient
