

BRATTICE & CURTAINS

ABC produces a wide range of line-brattice and curtains to manage and control underground mine ventilation.

We utilize ABC's tightly quality-controlled Hi-Strength PVC (curtains) and polyethylene (brattice) fabrics. Finished products are custom made to suit your needs for height, length, fabric weight, tear resistance, edge reinforcement, wall attachment and hanging setup.

Reinforced fabrics are fire rated (FR) and available in different color options to improve visibility and safety.

ABC's Hi-Strength materials are industry leading. PVC's are phthalate free, use organic colour ingredients and provide exceptional abrasion resistance.

BRATTICE & CURTAIN STANDARD FABRIC MATERIALS

COATED REINFORCED PVC

Fabric Type	Colour	Weight Oz/yd ² (g/m ²)
V860 (FR)	Safety Green	16.0 (550)
V870 (FR)	White	18.5 (625)
Type 45 (FR)	Safety Green	21.0 (715)
V5200 (FR)	Opaque	40.0 (1350)

REINFORCED COATED POLYETHYLENE

Fabric Type	Colour	Weight Oz/yd ² (g/m ²)
Type 1000 (CL)	Clear	3.3 (110)
Type 1000 (FR)	Opaque	4.0 (135)
Type 1500 (FR)	Opaque	5.4 (185)
Type 2000	Blue	9.0 (305)
